SUMMARY

iOS developer specializing in Swift and SwiftUI, with cross-platform Flutter experience and a QA analyst's background in accessibility and quality assurance testing. Shipped native iOS and Flutter apps to the App Store and Google Play using MVVM architecture and Firebase. Experienced working in agile teams with daily scrums and sprint planning. Currently seeking mobile development opportunities, iOS specifically, anywhere in Canada.

SKILLS

Mobile Development: Swift, SwiftUI, UIKit, Xcode, TestFlight, MVVM, Clean Architecture, Flutter, Dart, Provider, Bloc

Backend & APIs: Firebase (Auth, Firestore, FCM, Storage), Node.js, Spring Boot, MongoDB, REST APIs, GraphQL, Postman, Swagger

QA & Accessibility: Test Planning & Execution, Web & Mobile Testing, WCAG/NVDA Accessibility Audits, Root Cause Analysis

Tools & Methods: Git/GitHub, Jira, Confluence, Trello, Figma, AEM, Adobe Target, Braze, Agile, Scrum

AI-Assisted Development: Claude for Xcode, Cursor, Google AI Studio

PROFESSIONAL EXPERIENCE

QA Analyst — CIBC

Jan 2025 – Apr 2026

Toronto, ON, Canada

- Provided QA for the Enterprise Digital & Innovation team's Money, Lending and Investment pod, testing online and mobile banking campaigns within a 9-member agile pod alongside SMEs, editorial, graphics, and developers
- Wrote test plans and executed test cases; approved and released builds to staging environments for production deployment
- Conducted root cause analysis on defects and provided regular status reports to QA leadership and cross-functional teams
- Audited WCAG accessibility compliance using NVDA across AEM, Braze, and Adobe Target content workflows

Freelance Developer — Flutter & iOS

Mar 2024 – Dec 2024

Canada

- Designed, built, and shipped Flutter and native iOS apps end to end for independent clients, from Figma designs through TestFlight betas and store releases

Software Developer — Viithiisys Technologies

Jan 2019 – Jan 2021

Mohali, India — started as Software Development Intern (Jan–Jul 2019), converted to full-time

- Built Flutter and native iOS (UIKit) apps end to end using MVVM architecture and Provider/Bloc state management
- Integrated Firebase authentication and push notifications; built backend services with Spring Boot, MongoDB, and REST/GraphQL APIs
- Shipped features including Google Maps geomapping, Jitsi video calls, deep links, and PDF generation; released apps to the App Store and Google Play

SELECTED PROJECTS

WorkMateGo — iOS Construction Management App

Apr 2026 – Present

Native iOS app helping construction teams manage projects, job sites, tasks, and crews with real-time progress tracking. Built with SwiftUI, MVVM, and Firebase (Auth, Firestore, Storage); delivered through TestFlight and the App Store.

Vizitor — Visitor Management Platform

Jul 2019 – Jan 2021

Visitor check-in and badge-printing app with host notifications, pre-invites, and digital NDAs. Built with Flutter, GraphQL, Firebase Auth/FCM, and MongoDB; live on the App Store and Google Play.

Additional: Thanima Farm Life, a Flutter-based tour operations platform on Google Play (Mar 2025–Jan 2026) • Intrack Edu, a Flutter/iOS school management ecosystem (Jan 2019–Jan 2021)

EDUCATION

Business and Information System Architecture — Fanshawe College

2021 – 2023

London, ON, Canada

Bachelor of Engineering, Information Technology — Chandigarh University

2015 – 2019

Mohali, India
